Thursday, 28 January 2027

4:00 – 5:10 PM (SGT)

Online · Live Q&A

Bring your questions — the session closes with a live Q&A.

Robert Hecek AM

CHAIR & HOST

Chair, WAVO Global Education Hub

FEATURED SPEAKER

Ednas Wong

Licensed Appraiser,
Real Estate Practitioner & Trainer

About this webinar

This webinar provides a practical, globally relevant overview of how PropTech and AI are reshaping the valuer's toolkit. Rather than focusing on any single jurisdiction, the session draws on international case studies and cross-market comparisons to equip participants with a framework for evaluating, adopting, and responsibly integrating new technologies into everyday valuation practice.

Bring your questions — the session closes with a live Q&A.

What you will take away

- The current landscape of PropTech tools available to valuers globally, AVMs, machine learning models and remote sensing and data analytics platforms
- How AI-assisted valuation models are being validated, calibrated, and challenged under international standards (IVS, SISV, RICS, and equivalent frameworks)
- Opportunities and limitations of automated valuation models compared with traditional professional judgment
- Managing model risk: data quality, algorithmic bias, and explainability in AI-driven outputs
- Case studies of PropTech and AI adoption across commercial, residential, industrial and alternative real estate sectors internationally
- Practical guidance on maintaining professional accountability and client trust when technology informs the valuation process
- A forward outlook: how the valuer's role may evolve
